introduction to data mining Data mining is the process of discovering patterns in large data sets involving methods at the intersection of machine learning, statistics, and database systems. Data mining is an interdisciplinary subfield of computer science and statistics with an overall goal to extract information (with intelligent methods) from a data set and transform the information into a comprehensible structure for ...

introduction to data mining - [Voiceover] Hi, I'm Ron Davis and I want to introduce you to the land of Excel Data-Mining Fundamentals. In this course, we're going to cover some of the basics of data-mining and then we're going to go over and switch into Excel and do some actual data-mining. We'll apply different algorithms and we'll look at the output. The reason I'm particularly excited about that is today, because of ...
