sound at sight guitar grades 4 8 trinity guildhall sight reading A talk box is an effects unit that allows musicians to modify the sound of a musical instrument by shaping the frequency content of the sound and to apply speech sounds (in the same way as singing) onto the sounds of the instrument. Typically, a talk box directs sound from the instrument into the musician's mouth by means of a plastic tube adjacent to their vocal microphone.

sound at sight guitar grades 4 8 trinity guildhall sight reading Terminology Sight-reading. People in music literature commonly use the term "sight-reading" generically for "the ability to read and produce both instrumental and vocal music at first sight [â€] the conversion of musical information from sight to sound". Udtaisuk and some other authors prefer the use of the more specific terms "sight-playing" and "sight-singing" where applicable.
