teaching atlas of abdominal imaging Mutations: Note: Nonsense, frameshift and missense mutations have been identified. Most mutations are located within exon 1 and the homeodomain. Most missense mutations are clustered in the homeodomain whereas nonsense and frameshift mutations are mostly on the NH2 terminus of the protein.

Currarino syndrome

teaching atlas of abdominal imaging Note: Although it is possible to distinguish a number of different histological sub-classes of lung cancer by light microscopy, the most important current clinical distinction is between small cell lung cancer (SCLC) and non-small cell lung cancer (NSCLC). Based primarily on its clinical behaviour, SCLC, a neuroendocrine lesion, is considered as a separate entity to the non-small cell carcinomas.
